TECHNICAL SKILLS

Languages: Python, JavaScript , TypeScript

Frontend: HTML5, CSS3, React.js , Redux, Tailwind CSS , Next.js

Backend: Node.js, Express.js ,Firebase

Database: MongoDB, MySQL ,Redis

Deployment: Render, Vercel

DevOps: Docker , AWS , Git, GitHub

Tools: Razorpay , Shadcn UI, Framer Motion, Postman ,VS Code

PROFESSIONAL SUMMARY

Aspiring Full-Stack Developer and BCA undergraduate with strong hands-on experience building and deploying scalable web applications using Next.js, TypeScript, and the MERN stack. Skilled in developing real-time systems, authentication flows, and responsive user interfaces. Seeking a software development internship to contribute to high-impact, production-ready applications.

PROJECTS

Syntrix AI 🗄 | [React , Node.js, MongoDB, Firebase, Docker, Redis, Razorpay , langGraph](#) **09/2026**

- Architected a full-stack multi-agent AI platform on a microservices backend, using an API gateway to route client requests to independent Auth, Chat, Agent, and Billing services for modular deployment and scaling.
- Built 6+ AI agents (chat, code generation, image generation, vision analysis, web search, PDF summarization, PPT creation) powered by LLM APIs, embeddings, and a vector database.
- Enforced per-model rate limits and usage quotas, preventing abuse and keeping LLM API costs under control across subscription tiers.
- Secured the platform with Firebase Authentication n at the gateway, and implemented Razorpay subscription billing with payment verification to manage plan upgrades and access.

Lumina UI 🗄 | [React, Node.js, Express.js, MongoDB ,Firebase , OpenRouter,npm ,Razorpay](#) **07/2026**

- [Live Project](#)
- Built a full-stack web application that generates reusable React JSX components using the OpenRouter API, with real-time code preview using React Live.
- Published and maintained a reusable React component library as an npm package, enabling developers to install and integrate UI components into their own projects with a single command.
- Implemented user authentication with Firebase and a custom Node.js backend, supporting secure sessions and per-user storage of saved components in MongoDB.
- Integrated Razorpay payment gateway to support credit purchases for AI-powered component generation.

ChatBot 🗄 | [TypeScript, Next.js, React, MongoDB, ScaleKit, Gemini](#) **03/2026**

- [Live Project](#)
- Developed a full-stack AI-powered customer support chatbot using Next.js and TypeScript, enabling businesses to automate customer interactions.
- Integrated AI model (Gemini 2.5) to deliver real-time, context-aware responses based on custom business knowledge.
- Implemented secure authentication system using Scalekit, enabling user-specific dashboards
- Designed an embeddable chatbot script allowing seamless integration into any website with minimal setup.
- Utilized MongoDB for efficient storage and retrieval of user data and knowledge content.

EDUCATION

Yashwantrao Chavan Maharashtra Open University

08/2024 - 07/2027

Bachelor of Computer Application (BCA)

Mumbai, India

Elphinstone College

07/2022 - 05/2024

XII - 69.67%

Mumbai, India
